

Electronic Data Interchange 832 - Price/Sales Catalog (VICS Version - 4010)

## March 2011

## Purpose

This document provides detailed guidelines and conventions for implementing electronic price/sales catalog updates with Boscov's Department Stores. Our 832 Price/Sales Catalog, as detailed in this document, will provide you with all of the information necessary to fill our requirements.

These guidelines comply with published VICS standards for EDI version 4010 for all data elements and segments.
Mandatory segments and elements are always required on every document. Optional segments and elements that are required by Boscov's Department Stores are marked as "Must Use". Segment usage is marked at the top of each page under Usage. Element usage is marked in the far-left column beside each element. If the column is blank, the element is optional. Information in the Attributes column is from the VICS standards and is provided for reference only. Trading Partners must adhere to our requirements as indicated by "Must Use".

## Business Rules

At a minimum, UPC or EAN and Vendor's Style Number or Vendor's Catalog Number must be sent in LIN.

## Contacts

Transaction Testing: GXS Inc. 1.877.446.6847 Select Option 2

## Delimiters

Element Separator - "*"
(HEX "2A" in ASCII) (HEX " 5 C " in EBCDIC)
Component (Sub Element) Separator - ">"
(HEX "3E" in ASCII) (HEX "6E" in EBCDIC)
Segment Terminator - "~"
(HEX "7E" in ASCII) (HEX "A1" in EBCDIC)

## Need an EDI Solution?

We have selected GXS Inc. to administer our EDI operations and to enable our trading partners. For those trading partners who do not trade documents electronically, GXS offers a number of electronic commerce solutions to assist you.

For Service Bureau, call 1-800-872-8255. Select Option 2, then Option 3.
For all other solutions, call 1-800-872-8255. Select Option 1, then Option 4.

## Boscov's Department Stores 832 Price/Sales Catalog

Functional Group ID=SC
Introduction:
This Draft Standard for Trial Use contains the format and establishes the data contents of the Price/Sales Catalog Transaction Set (832) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide for customary and established business and industry practice relative to furnishing or requesting the price of goods or services in the form of a catalog.

| Segment: | GS Functional Group Header |
| :---: | :---: |
| Position: | 020 |
| Loop: |  |
| Level: |  |
| Usage: | Mandatory |
| Max Use: | 1 |
| Purpose: | To indicate the beginning of a functional group and to provide control information |
| Semantic Notes: 1 GS04 is the group date |  |
| Semantic Notes: | 1 GS04 is the group date. |
|  | 2 GS05 is the group time. |
|  | 3 The data interchange control number GS06 in this header must be identical to the same data element in the associated functional group trailer, GE02. |
| Comments: | 1 A functional group of related transaction sets, within the scope of X12 standards, consists of a collection of similar transaction sets enclosed by a functional group header and a functional group trailer. |

## Data Element Summary

```
ST Transaction Set Header
0 1 0
Heading
Mandatory
1
To indicate the start of a transaction set and to assign a control number
1 The transaction set identifier (ST01) is used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the Invoice Transaction Set).
```

## Example:

ST*832*832000706~

## Purpose:

## Syntax Notes: <br> Semantic Notes: <br> Comments: Notes:

BCT Beginning Segment for Price/Sales Catalog
020

Heading
Mandatory
1
To indicate the beginning of the Price/Sales Catalog Transaction Set and specify catalog purpose and number information

BCT10 is used only to clarify, to the receiver, the sender's purpose of the transaction set. Code 13 is used to request catalog information from the owner of the catalog or the authorized agent, e.g., a third party catalog service. Code 11 is used only when the transaction set is a reply to a specific request transaction. If the sender has a standing request from the receiver for specific data when a specific event takes place, e.g., women's tops, new products, every two weeks, this is NOT considered a response. The recipient will only receive a response (BCT10 contains code 11) if the recipient had previously sent a request (BCT10 contains code 13). Codes 02, 03, 04, and 05 are to be used to update catalog information kept by the user of the catalog data, e.g., a retailer or the vendor's agent.

If BCT10 contains code 00, a mix of adds, changes and deletes is assumed. The G53 segment, in the detail area, specifies the action to be taken.

Data may be requested or access may be granted to the entire catalog or a portion of it without regard to any specific $\operatorname{SKU}(\mathrm{s})$. When requesting or granting catalog access for the entire catalog, BCT03 is not used. BCT10 will contain code 13 for requests or code 02 or 03 for access control and the detail area (LIN loop) is not used. The same procedure is used to request data or grant access to a portion of the catalog by adding BCT03 with the appropriate selection code for the portion of the catalog needed.

Caution must be exercised when deleting a U.P.C. from the catalog. Due to ordering and shipping cycle times, a U.P.C. should reside on the catalog as discontinued at least one year after the last of the product has been shipped. Deleting the U.P.C. from the catalog does not alter the minimum retention period ( 30 months for apparel and 48 months for all other items) as defined in the U.P.C. Data Communications Guidelines for General Merchandise and Apparel.

## Example:

$\mathrm{BCT} * \mathrm{RC} * * * * * * * * * 02 \sim$

| Segment: | N1 Name |
| :---: | :---: |
| Position: | 150 |
| Loop: | N1 Optional |
| Level: | Heading |
| Usage: | Optional |
| Max Use: | 1 |
| Purpose: | To identify a party by type of organization, name, and code |
| Syntax Notes: | 1 At least one of N102 or N103 is required. |
|  | 2 If either N103 or N104 is present, then the other is required. |
| Semantic Notes: |  |
| Comments: | 1 This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party. <br> 2 N105 and N106 further define the type of entity in N101. |
| Notes: | This segment is used to identify the vendor's country of origin for the items and the shipping point(s) for the items. One segment (loop) for each point. |

Example:
N1*VN*BYDESIGN*92*BD001~

## Data Element Summary

| Segment: | LIN Item Identification |
| :---: | :---: |
| Position: | 010 |
| Loop: | LIN Mandatory |
| Level: | Detail |
| Usage: | Mandatory (Must Use) |
| Max Use: | 1 - |
| Purpose: | To specify basic item identification data |
| Syntax Notes: | 1 If either LIN04 or LIN05 is present, then the other is required. |
|  | 2 If either LIN06 or LIN07 is present, then the other is required. |
|  | 3 If either LIN08 or LIN09 is present, then the other is required. |
|  | 4 If either LIN10 or LIN11 is present, then the other is required. |
|  | 5 If either LIN12 or LIN13 is present, then the other is required. |
|  | 6 If either LIN14 or LIN15 is present, then the other is required. |
|  | 7 If either LIN16 or LIN17 is present, then the other is required. |
|  | 8 If either LIN18 or LIN19 is present, then the other is required. |
|  | 9 If either LIN20 or LIN21 is present, then the other is required. |
|  | 10 If either LIN22 or LIN23 is present, then the other is required. |
|  | 11 If either LIN24 or LIN25 is present, then the other is required. |
|  | 12 If either LIN26 or LIN27 is present, then the other is required. |
|  | 13 If either LIN28 or LIN29 is present, then the other is required. |
|  | 14 If either LIN30 or LIN31 is present, then the other is required. |
| Semantic Notes: | 1 LIN01 is the line item identification |
| Comments: | 1 See the Data Dictionary for a complete list of IDs. |
|  | 2 LIN02 through LIN31 provide for fifteen different product/service IDs for each item. For example: Case, Color, Drawing No., U.P.C. No., ISBN No., Model No., or SKU. |
| Notes: | ITEM MAINTENANCE LIN02 will be used to identify the ordering unit or the buyer's item number. This segment may be used in conjunction with the G39 segment to identify the vendor selling unit, e.g., U.P.C. Case Code or U.P.C./EAN Shipping Container Code (SCC-14), and the G55 segment to identify the consumer selling unit, i.e., item U.P.C. |

The codes listed for LIN02 apply to every occurrence of Data Element 235 in the LIN segment.

See Section III for complete U.P.C. and EAN code definitions.

```
    Segment: DTM Date/Time Reference
    Position: 030
        Loop: LIN Optional
        Level: Detail
        Usage: Optional (Must Use)
        Max Use: }1
        Purpose:
        Syntax Notes:
```

        Semantic Notes:
        Comments:
            Notes:
        This segment is used to override the corresponding date in the header area. This is only
        applicable to the item identified in the preceding LIN segment.
    
## Example:

```
    Segment: P\D Product/Item Description
    Position: 070
            Loop: LIN Optional
            Level: Detail
            Usage: Optional (Must Use)
            Max Use: 200
            Purpose: To describe a product or process in coded or free-form format
        Syntax Notes: }1\mathrm{ If PID04 is present, then PID03 is required.
            2 \text { At least one of PID04 or PID05 is required.}
            3 If PID07 is present, then PID03 is required.
            4 \text { If PID08 is present, then PID04 is required.}
            5 \text { If PID09 is present, then PID05 is required.}
            Semantic Notes: }1\mathrm{ Use PID03 to indicate the organization that publishes the code list being referred to.
            2 PID04 should be used for industry-specific product description codes.
            3 PID08 describes the physical characteristics of the product identified in PID04. A
                "Y" indicates that the specified attribute applies to this item; an "N" indicates it does
                    not apply. Any other value is indeterminate.
                            4 ~ P I D 0 9 ~ i s ~ u s e d ~ t o ~ i d e n t i f y ~ t h e ~ l a n g u a g e ~ b e i n g ~ u s e d ~ i n ~ P I D 0 5 . ~
Comments: }1\mathrm{ If PID01 equals "F", then PID05 is used. If PID01 equals "S", then PID04 is used. If
                PID01 equals "X", then both PID04 and PID05 are used.
            2 Use PID06 when necessary to refer to the product surface or layer being described in
                the segment.
            3 PID07 specifies the individual code list of the agency specified in PID03.
            Notes: The PID segment is used to provide product/item descriptions in text and or coded
            formats. The codes in PID04 are maintained by the VICS EDI SMC and are only printed
            in this guideline.
```

## Data Element Summary

Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set This must be the same number as is in the ST segment (ST02) for the transaction set.
Segment: GE Functional Group Trailer
Position: ..... 030Loop:Level:Usage:
Mandatory
Max Use: 1
Purpose: To indicate the end of a functional group and to provide control information
Syntax Notes:
Semantic Notes:

Ref.
Des.
GE01

## Data Element Summary

Mandatory
1
To indicate the end of a functional group and to provide control information
1 The data interchange control number GE02 in this trailer must be identical to the same data element in the associated functional group header, GS06.
1 The use of identical data interchange control numbers in the associated functional group header and trailer is designed to maximize functional group integrity. The control number is the same as that used in the corresponding header.

|  | Ref. <br> Des. | Data <br> Element <br> Must Use | GE01 | Name |
| :--- | :---: | :---: | :---: | :---: |
| Must Use | GE02 | $\mathbf{2 8}$ | Total number of transaction sets included in the functional group or interchange <br> (transmission) group terminated by the trailer containing this data element |  |
